INTRODUCTION

The European Union's legislation includes a significant number of legal provisions that mandate customs authorities and other relevant authorities to carry out controls at the EU's external borders. These controls are key to enforcing and ensuring compliance with the many different policies enshrined in EU law. They also help protect the EU's Single Market, its citizens and businesses, and the environment. In short, prohibitions and restrictions cover all EU sectoral (i.e. non-customs) rules and requirements for goods.

What are P&R (prohibitions and restrictions)?

In accordance with Articles 134 and 267 of the Union Customs Code (UCC)¹, prohibitions or restrictions may be imposed on imports, exports or goods in transit when they are justified on the grounds of:

- public morality, public policy or public security;
- the protection of health and life of humans, animals or plants;
- the protection of the environment;
- the protection of national treasures that possess artistic, historic or archaeological value; or
- the protection of industrial and commercial property.

These prohibitions and restrictions may include controls on drug precursors, goods that infringe certain intellectual property rights and cash.

¹ Regulation (EU) No 952/2013 of the European Parliament and of the Council of 9 October 2013 laying down the Union Customs Code, OJ L 269, 10.10.2013, p. 1.

Fishery conservation and management measures and commercial policy measures are not prohibitions and restrictions, even though their implementation is an intrinsic dimension of customs supervision (as also established by Articles 134 and 267 UCC). Sanctions² have a different legal basis in the EU Treaties and are neither prohibitions nor restrictions.

Prohibitions and restrictions may cover different requirements, such as:

- total prohibitions or bans³;
- required controls at the border by specialised competent authorities (health, food safety, etc.)⁴;
- quantitative restrictions under a quantity management system⁵;
- authorisation or registration of the importer⁶ or exporter⁷;
- authorisation/approval by an authority or notification to an authority of a shipment;
- additional documentation (licences, permits, certificates, declarations, statements, etc.) accompanying a consignment⁸.

To make it more reader-friendly, the list is structured around three primary ‘families’ of legal acts. This classification has no legal bearing or implication. It is intended only to make it easier to use the integrated EU P&R list. The three families are the following.

- ‘Manufactured products’ covers 167 legal acts (including 157 that were in application on 1.7.2026 and 10 that had been adopted on that date but had not yet entered into application) in various policy fields. In particular, this family covers all the legal acts subject to Chapter VII of Regulation (EU) 2019/1020 on market surveillance and compliance of products⁹.
- ‘Agri-food’ covers 184 legal acts (including 180 that were in application on 1.7.2026 and 4 that had been adopted on that date but had not yet entered into application) aiming at protecting health, animal and plants, as well as relating to food and feed in general.
- ‘Other prohibitions and restrictions’ covers 32 legal acts (including 29 that were in application on 1.7.2026 and 3 that had been adopted on that date but had not yet entered into application) that do not strictly relate to manufactured products or agri-food (e.g. forced labour, firearms, dual-use items and explosives). Given their specificities, they are placed in this separate third ‘family’.

² Article 29 of the Treaty on European Union (TEU) and Article 215 of the Treaty on the Functioning of the European Union.

³ For example, for seal pups (Council Directive 83/129/EEC of 28 March 1983 concerning the importation into Member States of skins of certain seal pups and products derived therefrom, OJ L 91, 9.4.1983, p. 30).

⁴ For example, on live animals (Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products, OJ L 95, 7.4.2017, p. 1).

⁵ For example, for hydrofluorocarbons (Regulation (EU) 2024/573 of the European Parliament and of the Council of 7 February 2024 on fluorinated greenhouse gases, amending Directive (EU) 2019/1937 and repealing Regulation (EU) No 517/2014 (OJ L, 2024/573, 20.2.2024, ELI: <http://data.europa.eu/eli/reg/2024/573/oj>).

⁶ For example, for:

- medicinal products for human use (Directive 2001/83/EC of the European Parliament and of the Council of 6 November 2001 on the Community code relating to medicinal products for human use, OJ L 311, 28.11.2001, p. 67);
- veterinary medicinal products (Regulation (EU) 2019/6 of the European Parliament and of the Council of 11 December 2018 on veterinary medicinal products and repealing Directive 2001/82/EC, OJ L 4, 7.1.2019, p. 43, ELI: <http://data.europa.eu/eli/reg/2019/6/oj>); or
- explosive precursors (Regulation (EU) 2019/1148 of the European Parliament and of the Council of 20 June 2019 on the marketing and use of explosives precursors OJ L 186, 11.7.2019, p. 1).

⁷ For example, for the import and export of fluorinated greenhouse gases (Article 22 of Regulation (EU) 573/2024).

⁸ For example, for reporting obligations on production, import and export of fluorinated greenhouse gases (Article 26 of Regulation (EU) 517/2014, Commission Implementing Regulation (EU) 2024/573).

⁹ Regulation (EU) 2019/1020 of the European Parliament and of the Council of 20 June 2019 on market surveillance and compliance of products and amending Directive 2004/42/EC and Regulations (EC) No 765/2008 and (EU) No 305/2011 (OJ L 169, 25.6.2019).

What is this document?

The Directorate-General for Taxation and Customs Union drew up this document, in collaboration with the other relevant directorates-general of the European Commission, to provide the general public with more information about EU policies in general and about prohibitions and restrictions in particular.

This document compiles the EU-level prohibitions and restrictions that were in application on 1.7.2026 or that had been adopted and were due to enter into application after that date. It should serve as a practical instrument for the EU's institutions, for the Member States' customs and other competent authorities, and for other interested stakeholders.

The dates that are mentioned are the main dates of entry into application. There may be specific dates of entry into application (for example, in the case of specific articles that enter into application earlier or later than the act in general) or transitory provisions. Please always check all details and particularly the dates of entry into application in the latest consolidated version of the relevant legal act on the EUR-LEX website¹⁰.

What does this document contain?

The document contains references with hyperlinks to EU legal acts that impose prohibitions and restrictions at the EU's external borders. Some legal acts have direct application for customs authorities. Others are only provided for information because the decision whether or not to involve customs authorities is a matter of national discretion.

This document usually includes only the main act – and not delegated or implementing legal acts. However, this document does cite the relevant secondary legislation if the main act is only a framework legal act and understanding its subject matter and scope requires reference to delegated or implementing acts. This is particularly the case in the following sectors:

- ecodesign;
- ecolabelling;
- energy labelling;
- official controls; and
- general product safety.

What does this document not contain?

This document does not contain references to:

- national legislation;
- commercial policy measures, agricultural policy measures and fishery conservation and management measures – unless they also have as a secondary objective the protection of the EU with prohibitions and restrictions imposed on goods;
- harmonised EU standards that are published in the Official Journal¹¹ in accordance with some of the legal acts listed;
- sanitary and phytosanitary emergency measures¹²;
- EU sanctions¹³, which have a specific and different legal basis in the Treaties (Articles 29 TEU and 215 TFEU) and are accordingly not prohibitions and restrictions (as explained above).

How does this document present the information?

This document is composed of two different parts:

- An indicative calendar with adopted legal acts entering into or ceasing application after 1.7.2026. This allows interested stakeholders to understand and anticipate forthcoming changes to the EU P&R acquis.
- An indicative list of EU legal acts that have been adopted, whether they are already in application or will enter into application at a later date.

¹¹ References to harmonised EU standards may be found on this website: https://ec.europa.eu/growth/single-market/european-standards/harmonised-standards_en.

¹² No comprehensive list of such measures is available. A list of special import conditions for the importation of products of animal origin into the EU is available here at the time of publication of this document: https://ec.europa.eu/food/system/files/2020-02/bjps_special-import-conditions_list.pdf. A list of emergency control measures by plant pest is available here at the time of publication of this document: https://ec.europa.eu/food/plants/plant-health-and-biosecurity/legislation/control-measures_en.

¹³ For more information on sanctions, please consult the following website: <https://data.europa.eu/apps/eusanctionstracker/>. Note that the sanctions tracker is an IT tool for identifying the sanctions regimes. The source of the sanctions stems from legal acts published in the Official Journal. In the event of any discrepancy the Official Journal version prevails.
